

## LIGHT

There are many regions in Africa without electricity. Kerosene lamps are harmful to health and are expensive.

ABIOLA has so far donated 4,500 solar systems to families in 18 different African countries and has a big goal of 10,000 donated systems.

Help us!

## EDUCATION

Few schools in Africa have computers for education. ABIOLA has donated 450 PCs to schools. About 1,300 students are studying the free ABIOLA online Academy courses in 81 African schools. About 100,000 reports are studied each year. All courses are freely accessible worldwide.
